

### *How the “Car Allowance Rebate System” works:*

According to information released to date regarding provisions of the Consumer Assistance to Recycle and Save program of 2009, the “Car Allowance Rebate System” works like this:

Eligible trade-in vehicles may qualify for a credit of up to \$4,500 towards the purchase of new more fuel-efficient vehicles.

Currently, eligible trade-in vehicles are described as such:

1. Built in 1984 or later.
2. Gets 18 MPG or less in combined city/highway driving as per the EPA.
3. Is in drivable condition.
4. Is registered and insured in the customer’s name for at least a year.

New vehicles eligible for purchase or minimum five(5) year lease must meet the following requirements:

1. New cars must get at least 22 MPG in combined city/highway driving as per the EPA.
2. New car MSRP must not exceed \$45,000.
3. New small light-duty trucks must get at least 18 MPG in combined city/highway driving as per the EPA.

The credit amount you qualify for will be based on the difference in combined MPG ratings between your trade-in vehicle and your new credit-eligible Chrysler, Dodge, or Jeep vehicle from York.

For example: a 4 MPG improvement for a new car (2 MPG for small trucks) earns a trade-in credit worth \$3,500. While a 10 MPG improvement for a new car (5 MPG for small trucks) qualifies for the maximum \$4,500 trade-in credit.

The intent of this government program is to encourage consumers to trade-in their old, low fuel economy vehicles for new, more fuel-efficient vehicles. This will help to improve the environment and, at the same time, stimulate new car sales for the auto industry. This program is set to begin in the third week of July 2009.
